

## FlatHead

The new Flathead is one of the finest shooting releases we've ever offered. This small package has the same durability and reliability as our legendary Fletcher but with the forward trigger design, it will help get back valuable draw length. It also features our exclusive self locking, over-center trigger design that provides a smooth, fully adjustable trigger pull and an inset hook that works great with a string loop. The Flathead comes in Toxic Green on Black anodize and is available with a deluxe buckle or velcro wrist strap.

Warranty

## TRU-PEEP

World's favorite Peep Sight, the FLETCHER TRU-PEEP is an all aluminum peep sight that weighs a mere 8 1/2 grains. The ingenious design allows for a perfectly round, shaded hole at full draw and eliminates the need for protruding hoods. String roll and angle are not a problem. Safety-tie groove keeps peep in place. The TRU-PEEP is available in seven sizes. The HUNTER is a 1/8" hole, MINI HUNTER is a 3/32" hole, the LARGE is a 1/16" hole, the SMALL is a 3/64" hole and the MICRO is a 1/32" hole. No tools needed for installation.

### SUPER HUNTER

The Super Hunter has a full 3/16" diameter hole for low light situations.

### MAX HUNTER

The Max Hunter has a full 1/4" diameter hole for super low light and to center up the pin guard or scope.
