### **POLYMERIC BOWSTRING FLUID**

An odor-free polymeric based fluid that puts more than just a little sting in your string!

This product enhances string performance and helps prevent frayed appearance of string fibers. Works right down to the bundled core to lubricate and protect the fibers. Your string will look new and wet.

This bowstring fluid maintains its supple characteristics in any climate/temperature conditions.

Apply to all areas of the bowstring that **DOES NOT MAKE CONTACT** with the bow or its parts.

### **POLYMERIC BOWSTRING WAX**

A waterproof polymeric wax designed with functionality and ease of use.

A tenacious, flexible, non-brittle coating that in any climate will not melt or freeze.

Leather applicator included.

### **TARGET ARROW RELEASE FLUID**

Possibly the slickest formula available, this polymeric blend of ingredients is formulated for your 3-D target events.

Arrows are easily removed from today's high-density 3-D targets allowing you to get back to shooting in a flash.

Eliminates tedious exertion from removing arrows.

Only need to be applied to the tip of your arrow.

### **CAM AND SERVING LUBE**

Specifically designed odor-free lubricant for the cam, idler wheel, pins, bushings and string guide.

Highly lubricious and penetrating, this fluid protects the string serving, reducing friction without tack. Works in any climate.

Helps prevent peep rotation. Will not freeze gum-up or buildup on your bowstring.

### **ANTI-VENOM STRING CLEANER**

An odor-free cleanser and pre-lubricant fluid that easily removes abrasive dirt, wax, old lubricant and grime.

Restores eye-popping color of your string while cleaning to the core.

### **BISCUIT SPRAY**

*"Don't risk it, spray that biscuit!"™*

Helps increase arrow speed and decrease noise by reducing friction.

Easy application with no mess and no odor.

Waterproof. Works in any climate.

### **CROSSBOW RAIL LUBE**

Crossbow Rail Lube reduces friction and enhances string life.

Helps increase arrow speed and protects string serving.

Waterproof and odor-free.

### **TRADITIONAL BOWSTRING WAX**

A unique blend of waxes adheres and binds the strings together providing an even coating for maximum protection.

Holds the string bundles together without excessive tack.

Does not require burnishing to apply like other products.

Pull string through wax, working into the string with your fingertips before stringing bow.
