

THE BEST ARCHERY TARGETS IN THE WORLD

# AIM FOR THE BEST

## TAKE YOUR BEST SHOT WITH RINEHART

Welcome to the most exciting lineup of best-in-the-field 3D archery targets in Rinehart's seven-year history! In our new Rinehart Targets catalog, we're proud to provide more innovations, more shooting thrills and more arrow-stopping value than ever before.

Whether you're a club shooter, a backyard archer or a seasoned bow-hunter,

you're sure to discover that the name Rinehart defines what a target should be. Call Rinehart today to find your local authorized Rinehart dealer nearest you or for special club pricing.

— James & Barbara McGovern

## Solid Rinehart "Self-Healing" Foam

Target, heal thyself! Rinehart's exclusive solid, self-healing foam targets can take hit after hit after hit without tearing or other damage. Whether you're shooting fieldpoints, broadheads or even expandables, Rinehart lets you take your best shots every time without loss of target integrity or risk of shoot-throughs.

## Healing Power

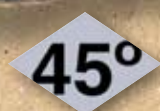

Solid Rinehart self-healing foam quickly stops even the fastest incoming carbon, aluminum or wood arrows.

Pulling arrows should not be so strenuous — and with Rinehart, it has never been easier! No Lubricant. No Gimmicks. No Pullers Needed!

Within 10 seconds arrow holes "heal" themselves. Complete target integrity is restored when arrow is quickly and easily removed.

## Icon Legend/Size Key

Can be shot at a 45° angle.

Shipped by truck.

Cut before shipping. (UPS)

Broadhead friendly.

Shows vitals.

Height — from ground to shoulder.

Length — from shoulder to tail.

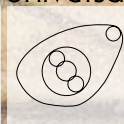

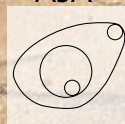

Unless noted otherwise.

Target Scoring —

Rinehart Targets – Nearly Indestructible!  
(Target on display at ATA show.)

## Stands Up to Clubs, Trucks and More

Rinehart 3D targets not only withstand the near continuous abuse of club and competition shooting, they've even been thrown under semi trucks and run over repeatedly – on purpose – to see how they survive. **The result?** A little dust and dirt, but no damage to the target.

It's no wonder that archery clubs across America and around the world are making the switch to nearly indestructible Rinehart 3D targets to get the most "arrow time" and value from their target investment.

Semi truck vs. Rinehart deer

## Rinehart Targets Shine In Any Weather

Bedded Doe  
3D Target

**7 Years Ultraviolet Exposure  
and Still 100% Shootable**

**Oh deer!** After literally years of exposure to the harshest weather conditions, including blazing sun and freezing temperatures, Rinehart's exclusive arrow-stopping, solid self-healing foam, proves to be virtually weatherproof. With colored foam all the way through the target and rugged "Uni-Body" assembly, these 3D targets are ideal for year-round use in the backyard or in the field.

Rinehart's solid self-healing foam construction is exceptionally resistant to the damaging effects of ultraviolet rays.

The Rinehart 3D Doe target (shown above) was exposed to direct sunlight and inclement weather for more than 2,500 days and remained as shootable as its very first day in the field.

How long will your Rinehart last? Even Rinehart's first targets, purchased more than 7 years ago, are still stopping arrows today!

## If You Hate Setting Targets, You'll Love Rinehart

The patented Rinehart "Stand Alone" accessory makes set up as fast and easy as "1-2-3-Shoot!" so you can shoot more, shoot longer, with less hassle.

1. Place  
"Stand Alone"  
in target

2. Rotate  
target up

3. Hammer  
two stakes  
into ground

4. Target is  
ready to take  
on all arrows!

Total setup time for one man is 45 seconds.

# INSERTS

Beauty is more than skin deep... It's not enough to look great on the outside — that's why we've developed the whole package, from our exclusive solid, self-healing foam to our unique Rinehart Internal Locking Insert System and Rinehart inserts — using the finest components. Our attention to detail really separates us from the pack.

## Patented Locking Inserts

Rinehart's exclusive Internal Locking Insert Tubes lock the target insert in place until it's time to replace the used one. To release the locking insert, pull the two plastic tubes down — releasing the target insert — then push out the used insert and simply replace it with a new one. It's that easy!

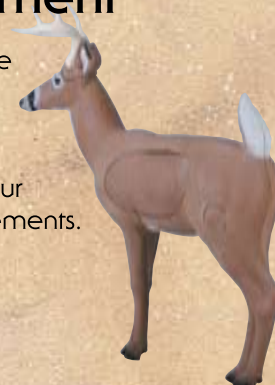

## Rinehart Inserts

Shooting 3D targets is fun for all ages but can be very costly at times. So, why buy targets that wear out and have to be replaced when you can buy a Rinehart target that lasts? All Rinehart targets and inserts feature Rinehart's exclusive solid, self-healing foam, which can take countless shots from fieldpoints, broadheads and expandables — without tearing or falling apart. If you shoot out your 3D target insert, you can simply buy a replaceable insert for a fraction of the cost of a new target.

## 45° Shot Placement

Every hunter loves a challenge — to prove their worthiness in the woods. Well, Rinehart inserts include the perfect score-lines to practice both your 45° and broadside shot placements. Make sure your next shot is the perfect shot! Look for the 45° symbol.

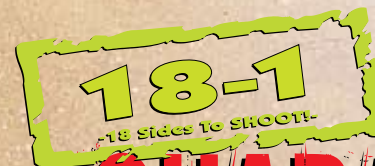

18-1

# 18-1 TARGET

The Only Target Guaranteed for a Full Year!

## GUARANTEED!

FOR A FULL YEAR

This target shows you its best side every time and is the longest lasting archery target we've ever offered. We even guarantee the 18-1 for a full year! With 18 vivid target zones made from legendary solid Rinehart "self-healing" foam, the 18-1 can take arrow after arrow without losing its shape or integrity. The 18-1 is lightweight with its own easy-to-carry handle, making it perfect for practice almost anywhere – at the club, in the backyard, or even a quick practice session at hunting camp. Whether shooting broadheads, field points or even expandables, the combination of solid Rinehart "self-healing" Foam and 18 sides make this the longest lasting target available.

If you shoot out all 18 sides, visit your authorized Rinehart dealer and we'll replace it — guaranteed hassle-free!

# DEER TARGETS

Is it real, or is it Rinehart? When it comes to life-size, realistic 3D targets, experienced archers know that, from body positioning to anatomically accurate vitals, Rinehart is **as real as it gets**.
